

**Date:**

**Wednesday, March 24, 2010**

**Time:**

**4:00 p.m. – 4:20 p.m.**

**Presentation:**

***“Green Water Treatment for Residential & Commercial Applications”***

D. Samuel Karge  
Global Director of Marketing

Water Treatment goes well beyond just removing unwanted substances from your water. It can take both municipal, or other source water and improve it using a number of different technologies. Recent advancements in technology allow for water treatment to be far more green, reducing their overall impact on the environment. This presentation will review some of these recent changes, along with changes in labeling, certification, governmental rules, as well as new research studies showing the overall benefit for this technology.

**Presenter Biography:**

Sam Karge is the Global Director of Marketing for Pentair Residential Filtration, one of the largest players in the Residential and Commercial water treatment markets. Headquartered in Milwaukee, WI, Pentair Residential Filtration is the market leader in water technologies for water conditioning, filtration, deionization, disinfection and water treatment. Sam has been with the business for over 12 years, having worked with both Osmonics, Inc., and GE Water & Process Technologies.
