

**Date:**

**Thursday, March 25, 2010**

**Time:**

**4:45 p.m. – 5:05 p.m.**

**Presenter:**

**“Networked Electric Vehicle Charging Stations: Introduction & Demonstration”**

David Hansen

Energy Manager, Electric Charge Mobility / A-A Exteriors

The age of the electric vehicle will be upon us very soon. Electric Charge Mobility LLC is the Wisconsin, Minnesota and Iowa distributor for Coulomb Technologies Electric Vehicle Charge Point Stations. Our mission is to install and develop a charging infrastructure to make EV travels become flexible and convenient in your neighborhood, community, state, and through out the USA. These stations are platformed on a safe and secure bi-directional, Network Operating System. This network capability allows the driver, station owner and local utility to make an EV charge a convenient, easy and reliable experience. Dave will be explaining the technology and walking through a simulated vehicle charging event.

**Presenter Biography:**

**David Hansen**

After spending 15 years as a pioneer in the micro and specialty beer industry, David Hansen has been in the energy field since 2006. Working as a regional sales manager for A-A Exteriors, Dave sold insulation and air sealing to residential and commercial customers through out SE Wisconsin. Dave also has extensive experience in commercial air infiltration and building envelope testing in Wisconsin, Illinois and Georgia over the past several years. Dave also worked with Franklin Energy as an Energy Advisor for the WE Energies Multi-family program.

Dave is now owner of Lake Country Energy and is currently an independent sales rep for ElectriCharge Mobility, A-A Exteriors, and a partner with Orion Energy Systems through his affiliation with A-A Exteriors.
