“Building Energy Dashboard - monitoring, tracking & reporting your building's energy use”

Mark Holter

Director, Energy Solutions, Uihlein Electric Co., Inc

Your car has a dashboard -- why not your building? Uihlein's Energy Solutions program, called Building Dashboard®, is used by thousands of people to understand, manage and compare resource consumption in real time on the web.

- Real time feedback from Building Dashboard® has been used to reduce energy in building's by 10-50% and promote social responsibility towards energy conservation.
- Great Educational opportunity for Schools to use Building Dashboard® as a teaching tool at their own building to educate students and facility about both energy awareness while promoting and achieving energy reduction at the same.
- Web-hosted content, for unlimited # of users.
- Hold Energy Competitions nation wide with other schools, business or groups you want to challenge on Energy Reductions campaigns.
- Hamilton University in New York saved \$6,000 in 15 days from Energy Competition
- Systems for Schools, Companies and Homes
- Learn why local Universities are looking to Building Dashboard® as part of dorm building energy conservation plans.

Presenter Biography:

Mark Holter

Uihlein Electric created its Energy Solutions group in the summer of 2008 as a way to help their customer base and new customers find successful solutions to ever rising energy costs. Through creation of this group Uihlein has developed Building Energy Usage Solutions that will help create and author organizations energy strategy and define energy solutions for existing and new buildings. Their success has been built on the rigorous application of a five step "Energy Solutions Process". Starting with a Planning session, their team will help look at your organization's goals and your facility as they relate to your core business, facility needs, finance and environmental impact. Once your goals are understood, their team of professionals will take you through Feasibility, Design, Implementation then finish with Measurement and Verification to ensure that both energy reduction and financial goals were realized.

Mark Holter, Director of Energy Solutions leads the group that seeks to author real solutions that are financially viable and bring the best ROI to their customer's and clients. With an extensive background in Electrical Contracting, and a strong awareness of ever changing trends in Energy Reductions Strategies, he has assembled a team of professionals to deal with the entire Energy Spend for any building or environment.
